EU institutions

Industry

FCH-JU
HyER’s mission

• Support the deployment and commercialisation of battery electric and fuel cell electric vehicles

• Assist our members to develop their hydrogen activities by enabling the share of knowledge and capacity for decision making

→ Sustainable transport and energy systems in the EU
Key objectives

1. Keep members updated and circulate the right information

2. Bringing regions together: networking actions and events

3. Bridge the gap between regions and the industry: bringing actors together

4. Liaison between the members and EU institutions
Why join HyER?

- Benefit from the knowledge and experience existing in the network
- Networking in Brussels
- Newsletters: policy developments and funding opportunities
- Links with the industry
- Working groups to work on specific topics
- Dissemination of your regional activities
- Project development with other regions
- Increased political visibility on the EU level
- Liaison with EU institutions
- Regular seminars/workshops organised – high level speakers
- Newsletters: policy developments and funding opportunities
Involvement in projects

Facilitate project development
Thank you for your attention
